

FESCUE TURF

This mixture contains up to 3 varieties of improved Turf Type Tall Fescue and 10% of our Bluegrass Sod Blend

Now you have the ability to use Turf Type Tall Fescue in the form of sod - the best of both worlds, instant lawn with low-maintenance and long-term use.

Once established, environmentally friendly, Turf Type Tall Fescue requires little water, 30% to 40% less fertilizer and handles shade quite well.

BLUEGRASS SOD

365ss Kentucky Bluegrass blend, developed through years of turf grass research and development to provide adaptability to different environmental conditions as well as disease resistance. Grown on our sandy loam-type soil, which gives TTF sod blend the capability to transplant on any type of soil.

TAHOMA 31[™]

BERMUDAGRASS

In test after test, Tahoma 31 shows its exceptional winter hardiness, tested up to 75% more cold tolerant than other bermudagrass varieties. With the additional characteristics of both improved wear tolerance and drought resistance, Tahoma 31 is ideal for sports turf and golf courses in the Mid-Atlantic & Transition Zone.

HARVEST OPTIONS

10 Sq Ft Rolls
Standard Cut 2' x 5'

250 Sq Ft, Big Rolls
4' with soil profiles up to 2"
